However, some figures and Supplemental Material published in *EHP* articles may not conform to [508 standards](#) due to the complexity of the information being presented. If you need assistance accessing journal content, please contact [ehponline@niehs.nih.gov](mailto:ehponline@niehs.nih.gov). Our staff will work with you to assess and meet your accessibility needs within 3 working days.

## **Supplemental Material**

# **Perfluoroalkyl Substances during Pregnancy and Offspring Weight and Adiposity at Birth: Examining Mediation by Maternal Fasting Glucose in the Healthy Start Study**

Anne P. Starling, John L. Adgate, Richard F. Hamman, Katerina Kechris, Antonia M. Calafat, Xiaoyun Ye, and Dana Dabelea

### **Table of Contents**

**Figure S1.** Participant eligibility flow chart.

**Table S1.** Characteristics of 1,299 mother-term infant pairs enrolled in the Healthy Start study, 2009-2014.

**Table S2.** Concentrations (ng/ml) of 11 perfluoroalkyl and polyfluoroalkyl substances among 628 eligible participants in the Healthy Start study.

**Table S3.** Spearman rank correlations of serum concentrations (ng/ml) of perfluoroalkyl substances among 628 eligible participants in the Healthy Start study.

**Table S4.** Maternal serum perfluoroalkyl substances and neonatal fat mass and fat-free mass among 604 mother-infant pairs in the Healthy Start study.

**Table S5.** Maternal serum perfluoroalkyl substances and fasting lipids at mid-pregnancy among 598 mother infant pairs in the Healthy Start study.

**Table S6.** Natural direct effects and indirect effects mediated through maternal glucose concentration among 628 mother-infant pairs in the Healthy Start study.

**Table S7.** Comparison of least squares and elastic net regression multi-pollutant models for the association between perfluoroalkyl substances and birth weight and adiposity among mother-infant pairs in the Healthy Start study.
